

Environmental Policy Statement

At Micron Metrology 2000 Ltd we recognise that virtually all the activities of an organisation or an individual have some impact on the environment. Our aim is to reduce the impact of our own organisation through a programme of continuous improvement.

In this respect our policy is to:

Quantify and monitor all environmental aspects of the business and impacts on the environment, and set specific targets to reduce the impacts from significant impacts such as waste, water, energy and fuel;

Comply with current legislation and, where practical, seek to meet future legislative requirements ahead of relevant deadlines;

Integrate environmental objectives into relevant business decisions in a cost-efficient manner;

Require all colleagues to address environmental responsibilities within the framework of normal operating procedures by communicating the requirements of this policy and providing relevant training;

Committed to prevent pollution and to continual improvement by minimising waste, also seeking to recover as much as is economically practical and ensure the remainder is disposed of responsibly;

Develop appropriate emergency response plans for major incidents in order to minimise their environmental impact;

Seek to influence suppliers of services to reduce their impact on the environment;

Enhance awareness of relevant issues among customers, colleagues and others who have an interest in our business;

This Policy will be reviewed on a regular basis in accordance with changing legislation and operating conditions, revised and communicated to relevant Personnel.
